## Summary

- Over 15+ years of IT experience which includes strong experience in Mainframe, Unix and SQL development.
- Having Application Development experience in **Mainframe COBOL, DB2,JCL, IMS DB/DC, CICS.**
- Over 5 year of Experience on **Unix** environment with **COBOL and SQL** Technology.
- Flexible and versatile to adapt to any new environment and work on any project.
- Team player with excellent communication skills.
- Easily adaptable to any kind of Technology and Work Environment.

I have around 15+ years of overall IT experience in the Mainframe technologies with Development and Application Support. I have strong technical skills in **Cobol, CICS, JCL, DB2, IMS DB/DC, Python.**

## EXPERIENCE

### **Wipro Technologies Ltd.**

I have worked in different domain like **Banking, Insurance, Gov., HealthCare and Retail**, which includes Requirement Analysis, Design, Coding and Development, Testing and scripting to generate Weekly and Monthly reports on project performance to get project status and maintained SQL databases, resulting in a 80% improvement in data integrity.

**Project Name: Walmart (Retail Domain)**

**Duration: January 2020 till December 2024**

**Client: Walmart, Bangalore.**

- Participate in business meetings and understand their requirements.
- Assess/Review and analyze the proposed solution.
- Estimation of requirements at various stages of the project
- Get approval from on the estimation and kick-off the project
- Specialized in Test Bed Preparation for User Acceptance Testing big projects.
- Communication Bridge between Business Users and Development team and solving complex user queries.
- **Analysis of business functionalities in programs.**
- **COBOL, JCL, IMS DB/DC, VSAM, DB2 Coding as per requirements and Fixing Bugs in Prod, CICS screen changes for existing Applications.**

Impact Analysis of the Design.

Production support

Maintenance as well for the existing

Enhancement Applications and Support Environment

**Project Name: DHS Australian Government, Adelaide Australia**

**Duration: August 2015 till November 2019.**

**Client: Australian Government Adelaide.**

**Project Overview:** The Department of Human services is responsible for the development of service delivery policy and provides access to social, health , Carer's, DSP, 3T and other payments and services. Working with Emergency Payment Systems on the COBOL, DB2, M204 and Janus SOA model in Mainframe.
