[arunkongube@gmail.com](mailto:arunkongube@gmail.com)

Mob: +91-8682848103

### OBJECTIVE

To work in an organization where harmony between professional and personal goals is the key to shared success and where I can implement my analytical, technical and interpersonal skills to increase company's profitability and take my career to new heights.

### TECHNICAL SKILL SET

- Total Experience : 8 years
- Languages Known : COBOL, JCL, VSAM, DB2, SQL, MF COBOL
- Tools : CCF, Expediter, EZYEDIT, SPUFI, netexpress, SQL server management studio
- Operating Systems : Z-OS (Mainframes Operating System),

### ORGANIZATIONAL EXPERIENCE

#### Accenture Solutions Pvt. Ltd.

##### Project - QBE Insurance

- Technology : Mainframes (COBOL, JCL, VSAM, DB2, SORT, MF COBOL, SQL)
- Nature of Job : Development/Support/Testing
- Domain : Insurance
- Team Name : GAIN (General Automated Insurance Network), Reinsurance

##### Description:

GAIN is a mainframe policy admin system which supports for commercial line policies. This project involves process of possible transaction such as New Business, Renewals, Amendments, Reinstatement and Cancellation. Quotes policy from AQS, EBIZ / Agency Port.

Reinsurance team supports Assumed and ceded reinsurance. It helps to create contracts with multiple LOBs and premium calculation. I have worked in Microfocus COBOL in development, testing and support works. We largely used netexpress tool for MF COBOL and Microsoft SSMS for Database maintenance and job scheduling.

The process involved the following high level steps:

- Determining eligibility for transition.
- Worked in AM & AME projects
- Created a policy in the GAIN system.
- Process of calculating Premium by Major Broker & Rate file method process for various LOB (WC, Auto, Flexbiz, etc....)
- Handling the process of forms by various process such as Conditional Processing table and GTAM (Generalized Table Access Method)
- Support for Personal lines also for few Dwelling Fire LOB
- Policy Scan & Retrieve method which is already crossed the rates and surcharge and need to

correct the effective rates for respective effective date

- Worked in both Cobol and Cobol-DB2 program
- Worked in a shadow server changes which means transfer the data form one system to another via URL.
- Worked with clients closely understanding the requirements closely and deployed the code without any defect leakage.

Roles and Responsibilities:

- Responsible for analysing the approach documents and creating design.
- Have taken care of all kind of testing (Unit testing, Integration testing, Regression testing).
- Doing internal code review, assign and track defects if any.
- Responsible for development and monitor production and test batch support.
- Prepared Unit test cases for the Developed code.
- Worked for AD projects to provide the existing data and the respective field mapping.

Achievements & Certification:

- Completed Certification Basic Fundamental in Insurance Foundation Training (IFT).
- Completed Certification Basic AZURE (AZ-900)
- Appreciated by the Team lead and Project manager for being a very good team player and taking up additional responsibilities.
